**ECRJC court-ordered short-term group residents complete a personal assessment inventory of the seven universally accepted criminogenic risk factors and rank their motivation and confidence to change based on the “cycle of behavior change” recognized in the motivational interviewing change wheel.*

**ECRJC developed the Pre-Program Assessment inventory (completed within the first week) and Post-Program Assessment inventory (completed the last week). Residents initially meet with their primary counselor to review criminogenic needs to develop a case plan. Then residents follow up with the Program Coordinator to ensure the accurate criminogenic needs are being targeted based on file review and collateral resources. All submitted criminogenic factors, motivation to change, and confidence to change data is recorded resulting in these outcomes.*
