

***Precycling...
Waste Reduction...
Waste Prevention...
Source Reduction...***

Whatever term is used, they all refer to the same concept - ending up with less to dispose - less volume, less weight and fewer hazardous materials. Waste reduction is the best way to manage waste because it prevents waste generation and saves natural and financial resources.

Minnesota law requires waste haulers to provide volume-based fees. The larger the cart, the more you pay.

Waste Reduction Hints and Tips

Tips for reducing waste at home, school and work

- Avoid disposable, single-use items
- Only buy what you need
- Purchase products with recyclable or minimal packaging
- Use refillable spray bottles
- Use reusable bags
- Repair broken items, see our website for more information.
- Purchased reused, consignment or thrift items
- Set all printers to double sided printing
- Pack a no waste lunch
- Buy concentrates
- Borrow or rent seldom used items instead of purchasing them
- Before you recycle junk mail, call the senders 1-800 number and ask to be removed from their mailing list
- Buy in bulk
