

SHARP EDGES AND CORNERS

*All items shown on these pages are for example only. Their appearance here does not constitute an endorsement by Anoka County or an of its representatives.

Protective padding is available to wrap around dining room, coffee, or end tables to help protect children from sharp corners and hard edges. There are also padded inserts that fit into the corners for extra cushioning. They should be non-toxic, flame retardant materials.

Hearth guards are also available. They are made with fireproof padding so that you won't have to remove it when you use your fireplace.
